SUMMARY

Driven Information Technology student at Saigon University with a strong foundation in computer science and a passion for building practical, clean-coded solutions. Proven ability to quickly master new technologies and approach complex logic with a strong problem-solving mindset. Eager to contribute to high-impact projects while gaining hands-on industry experience.

EDUCATION

Sai Gon University

Information Technology

2023 – Present

Current GPA: 3.65/4.0

Awarded 6 academic scholarships to date

June 2023

Mac Dinh Chi High School

SKILLS

Languages: Java, C#, JavaScript/TypeScript, PHP, Python
Backend: Spring Framework, .NET, Node.js, Express.js, Kafka
Frontend: React.js, Next.js, Tailwind
Databases: MySQL, PostgreSQL
CI/CD: Github Action, Docker, Kubernetes, AWS, Ubuntu
Tools: Git/GitHub, VS Code, IntelliJ IDEA, Pycharm, Rider

PROJECTS

Medify – Microservices Medical Platform [GitHub]

Oct 2025 - Present

Next.js, Spring Boot, PostgreSQL, Tailwind, JWT, Docker, Kubernetes, Kafka

- Architected a high-scalability microservices system using Spring Cloud API Gateway to orchestrate services
- Engineered a multi-tenant scheduling engine that automates doctor availability and patient bookings
- Cloud-native infrastructure, designed for both server and cloud deployment via Docker and Kubernetes.
- Implemented secure authentication to ensure patient privacy.

Phone Store – E-commercial And CRM System [GitHub]

Jan 2025 - May 2025

React.js, Tailwind, PHP, MySQL, Docker

- Well-designed solutions for scability, suitable in many real life scenerios
- Built an all-in-one retail suite covering inventory tracking, CRM, and automated sales reporting.
- Designed a monolithic architecture for rapid deployment, ensuring high reliability

School Bus Management – School Bus Tracking System [GitHub]

Jun 2025 - Sep 2025

Next.js, Express.js, PostgreSQL, WebSocket, Mapbox API

- Developed a low-latency tracking system to provide parents with real-time bus location updates.
- Integrated Mapbox API for precise route visualization and geographic notification triggers.
- Improved student safety by automating arrival alerts monitoring for administrators.

PERSONALITIES

- Passionate about learning new technologies and quickly adapting to new environments
- Strong teamwork and communication skills
- Highly responsible and committed to delivering quality work
- Skilled in leadership and designing efficient systems
