SUMMARY

Driven Information Technology student at Saigon University with a strong foundation in computer science and a passion for building practical, clean-coded solutions. Proven ability to quickly master new technologies and approach complex logic with a strong problem-solving mindset. Eager to contribute to high-impact projects while gaining hands-on industry experience.

EDUCATION

Sai Gon University

Information Technology

2023 – Present

Current GPA: 3.65/4.0

Awarded 6 academic scholarships to date

Mac Dinh Chi High School

June 2023

SKILLS

Languages: C/C++, C#, Java, JavaScript/TypeScript, PHP, HTML/CSS, SQL, $\text{\LaTeX}$

Frameworks/Libraries: Spring Boot, React, Next.js, Express, Tailwind, Kafka

Databases: MySQL, PostgreSQL

CI/CD: Github Action, Docker, Kubernetes, Ubuntu

Tools: Git/GitHub, VS Code, IntelliJ IDEA

PROJECTS

Medify – Microservices Medical Appointment Scheduling Platform [GitHub]

Oct 2025 - Present

Next.js, React, TypeScript, Spring Boot, PostgreSQL, JWT, Docker, Kubernetes

- Architected a high-scalability microservices system using Spring Cloud API Gateway to orchestrate services
- Engineered a multi-tenant scheduling engine that automates doctor availability and patient bookings
- Cloud-native infrastructure, designed for both server and cloud deployment via Docker and Kubernetes.
- Implemented secure authentication to ensure patient privacy.

PhoneStore – Comprehensive Inventory and CRM Platform [GitHub]

Jan 2025 - May 2025

React, Tailwind CSS, PHP, MySQL, Docker

- Well-designed solutions for scabily, suitable in many real life scenerios
- Built an all-in-one retail suite covering inventory tracking, CRM, and automated sales reporting.
- Designed a monolithic architecture for rapid deployment, ensuring high reliability

School-Bus-Management – Real-Time School Bus Tracking System [GitHub]

Jun 2025 - Sep 2025

Next.js, Node.js, Express, PostgreSQL, WebSocket, Mapbox API

- Developed a low-latency tracking system to provide parents with real-time bus location updates.
- Integrated Mapbox API for precise route visualization and geographic notification triggers.
- Improved student safety by automating arrival alerts monitoring for administrators.

Software Testing – Comprehensive Testing For A Software [GitHub]

Nov 2025

React Spring Boot, PostgreSQL, JWT, JUnit 5, Cypress, Jest, k6, GitHub Action

- Designed and implemented a comprehensive multi-layer test suite covering unit, integration, and end-to-end tests across both backend and frontend.
- Implemented k6 for performance test to ensure system durability.
- Automated frontend and backend deployment and testing pipeline with GitHub Action

PERSONALITY

- Passionate about learning new technologies and quickly adapting to new environments
- Strong teamwork and communication skills
- Highly responsible and committed to delivering quality work
- Skilled in leadership and designing efficient systems
